UNION COLLEGE, LINCOLN, NEBRASKA, JUNE, 1951

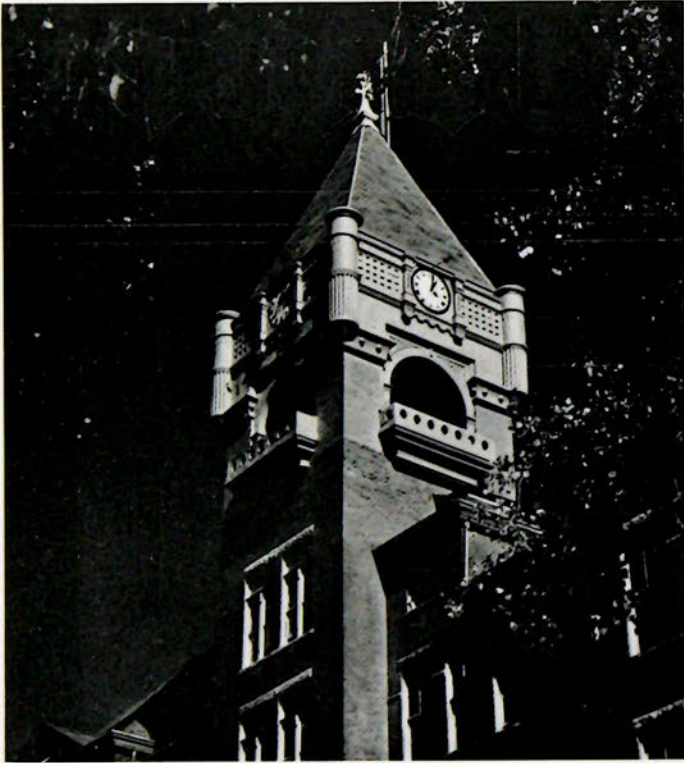

Number 16

UNION COLLEGE  
LIBRARY

JUN 19 1951

LINCOLN, NEBRASKA

## The Clock Tower

The CLOCK TOWER stands as a symbol to all those who have gone from Union College, their Alma Mater, and they take renewed hope and determination in their various activities, whether they be overseas or in the homeland.

On May 24 at the Alumni homecoming celebration, the community of College View and Union College celebrated the 60th anniversary of Union College. Rich in tradition but young in spirit, Union College continues to graduate young men and young women to meet the call of today anywhere in the world.

## CLOCK TOWER

Entered as second class matter at the post office at Lincoln, Nebraska, April 5, 1911, under Act of Congress, March 3, 1879. Acceptance for mailing at special rate of postage provided in Section 1103, Act of October 3, 1917, authorized June 17, 1921.

Published bi-weekly during the school year except during holidays, registration periods, and every month during the summer by Union College under the auspices of the faculty and students of Union College. Subscription rate: \$1:00 per year.

## The President's Message

At Union College we endeavor first to stress the spiritual phase of Christian education, then we turn to intellectual achievements and physical development.

Union College is based on faith in a personal God, making it unique in the field of education where the materialistic concepts are emphasized. God meant that His schools should train young men and women first of all for His kingdom, and then to serve humanity.

The three objectives set forth at Union College are: faith in a personal God, a mind that knows, and a heart that cares.

May God so bless Union College that it might fulfill its destiny.

Harvey C. Hartman

**Harvey C. Hartman**  
President

Union College Board of Trustees

**E. B. Ogden, Ph.D.**  
Dean

## Scholastic Standards of Union College

Union is noted for its high scholastic standards, and institutions of higher learning recognize this fact by readily accepting its graduates for advanced study. It is the work, hope, and prayer of the Administration and Staff that Union will long hold high its scholastic standards.

The same strong work will be given by our departments again next year, and the offering of classes is excellent. Some duplicate sections have been dropped for next year and some alternation of classes from year to year is planned; but other than this, much the same work is available now as has been offered for the last few years.

Union is your college. Make plans now to start or continue your Christian education. May the Lord help you to make the right decision and assist you in making your plans to be at Union this fall.

E. B. Ogden

## Improvements and Finances

Union has had a year of progress in renovating and repairing its many buildings. The most noteworthy project during the school year was the raising of approximately \$17,000 to refloor and ceil the auditorium-gymnasium building. The work on this building has gone forward rapidly and the ceiling should be completed in the next few days. Then the work will begin on the flooring about July 1.

Union has work this summer for those who would like to earn credit toward next year's expenses at the college. A student who applies himself can earn between \$200 and \$300 above his room and board for his summer's work. Interested students should correspond with the business manager.

Plan now to attend Union College where you can defray a large part of your next year's expenses.

Agriculture

**Russell T. Smith, M.D.**  
Health

Besides the regular departments on the campus there are such places as the library where a person can enrich his learning. There are definite work and play programs that a person can enter into to "harmoniously develop his physical, mental and spiritual powers.

One of those places where the college student can enrich his learning is the Art department. Training is given in art appreciation and its cultural expression.

**John Hawkinson, Art**

# *Activities*

Many recreational facilities are provided on the campus for all students. The gym will have a new floor when the students return in the fall, so skating will be even better.

After work and after play the students must enjoy a repast in the dining room where he can ready himself for more work and more play.

Every year in August the Biology department of Union College has a summer camp in the Rocky Mountains. Pictured above you have some of the fellows that attended the camp two years ago. The female of the species also attends although they are not pictured here. The group studies wild life and other biological subjects.

Below, the secretarial majors are busily practicing on the business machines in their laboratory. With the demand for secretaries at an all time high this department is very popular.
