My Dear Doctor Pang,

Today in sketchy land again in USA. It has been a quick trip and yet one in which we covered a lot of territory and did a lot of work. In Philippines we got our food work organized and plant equipment ordered & our selling agencies going. Your brother has organized a company as you know. He was a little anxious about the Pasadena Drug Co from whom they had no reply in reference to a large order placed with them. In all we did 94 operations while in the Islands at Manila & in Ilio Ilio. The Sanitarium is in a very delapidated state but it can be repaired but will take considerable time.

In China I met most all the old hands. Dr. Carl Wang came down from Nanking. He is very anxious to come to USA, & I am very sympathetic with this. Dr. Tai also, and both want to make social purchases of medicines and every one wants to buy a car in USA, & shop to China. I stayed at the clinic. Dr. Andrew Chen is the head doctor there and is doing very well. Dr. Wen is there and I believe she is more helpful than she used to be. Miss Yen is supt. of nurses. I went out to look over the Rubiken Rd Sanitarium & it is not too bad. They looted the doors & some windows & all the furnishing are gone. The Japs occupied it & built some additions to it.

in another letter Dr Tai is sending 100.00 which are mailing orders

The medical school was very much on my heart. I talked it in Philippines & talked it in China and the far east all definitely interested in joining in if we run a good medical school. The China folks seem for it but no one there to take a strong lead in it & of course I could only point out to them that now was a unique time to start it. Hankow seems the logical place. If we do not move the govt may take over our properties there. Mr. Byington has been at Hankow and is doing his best. The Hankow Prov. govt proposed to join with us to run a medical school for Central China. If such we have this property, the China folks would launch out for the far East to help secure the strength of C.M.E. & call it Lohasinda in China. Have a rally among the leaders in China, secure Mura & Sinda Cooperation & of course for this we can draw funds from res. & etc outside the organization. Really all that would be needed would be the "go" sign from G.O. and we could leave you to head it all up as all believe you could organize it best. However the only thing I know is for the Lord to urge us all into it. I am loath to make open promises it might prejudice more than help. But if the only thing I would do ring lead of Mura for the res, med, status & work loan to look over the needs at Pubeau & the clinic & be definitely promised help. May someday this system will come to the front of you but the time the medical participation is now to do something for the future staffing of our medical work in Asia. We can not send to America as you know must close hope to hear from you. Best regards sincerely your brother Samy Miller
