

TENTATIVE OUTLINE

DF 4

#85

For a booklet setting forth the counsels of the Spirit of Prophecy regarding Sanitarium Work in Southern California, and the establishment of the College of Medical Evangelists.

The aim of this booklet would be to perpetuate the counsels given as the foundation principles upon which the medical school should be conducted. The thrilling story of a call to the seemingly impossible, and some of the remarkable providences that made possible the response, amid tremendous difficulties, gives a setting that makes more intelligible the counsel received through the gift of prophecy.

INTRODUCTORY

This might set forth the call for the training of medical missionaries and physicians, with a brief but tactful statement of the school at Battle Creek, and its departure from right principles till the messages came warning our people not to send their youth there for an education. The perplexity of counseling prospective medical students.

PART I THE SECURING OF LOMA LINDA

I A Call to Extraordinary Effort in Southern California

- Counsels against centralization
- Plans for large Sanitarium in Los Angeles
- Timely Counsels received
- Location of Sanitariums
